

Content Delivery: A Total Enterprise Solution

Forward-thinking enterprises realize the importance of effective communication with their internal and external audiences. Companies are aggressively investing in video and other rich media, but they are challenged when it comes to efficient, secure distribution of large files to global, geographically-distributed workforces. Ignite's Content Delivery Solution addresses this challenge.

The Ignite Advantage

Founded in 2000, Ignite Technologies, Inc. provides the industry's most secure and scalable Content Delivery Solution, enabling customers to efficiently publish, deliver, and manage digital assets – from rich media content for training and communications to software patches and virus updates – to anyone, anywhere, at any time. Ignite's patented Content Delivery Solution overcomes network and connectivity constraints that have limited the ability to reach online audiences with the highest quality, secure rich media. Ignite's solution has been deployed around the globe at companies like Accenture, Bank of America, MillerCoors, and Cushman & Wakefield.

The Ignite Content Delivery Solution is a suite of software products and networking technology that enables users to manage the entire lifecycle of content publishing and distribution. The Ignite solution provides enterprises with the tools they need to publish, protect, target, deliver, track and measure any type of digital content – from high-definition video and media-rich PDFs to software executables and patches.

Featured Customers

Ignite's Solution has been deployed across hundreds of thousands of users around the globe at companies such as:

- Accenture
- Flowserve
- Canon USA
- Ciena
